WATER SERVICE APPLICATION

Terms and Conditions

This Application for Water Service ("Application") is by and between Blue Rock Water Company LLC, a Washington limited liability company, its successors and assigns ("Utility") and the Applicant ("Customer" or "Applicant") whose name(s) and signature(s) is/are shown on the first page of this Application.

CUSTOMER ACKNOWLEDGEMENT: By signing this document the Customer agrees to comply with the Utility's rules and regulations on file with the Washington Utilities and Transportation Commission ("Commission") in effect at the time of service and that they have been provided with such documents.

CUSTOMER LIABILITY: Customer shall be liable for any damage or injury to Utility owned property or personnel shown to be caused by the Customer, his invitees, his agents, his employees, or others under his control. By accepting service under this agreement, Customer agrees to take no action to create a health hazard or otherwise endanger, injure, damage or threaten Utility's plant, its personnel, or its Customers. Failure to comply with this provision shall be grounds to terminate Customer's service.

EXTENSION AND FACILITIES: If the services of a registered professional engineer are required as a result of an application for service to that Applicant only, Utility and the Applicant will select such engineer, and Applicant shall bear all expense incurred therein. If an Applicant requires service, other than the standard service provided by Utility and denoted in the tariff rate schedule, the Utility will submit a contract proposal to the Commission for review and approval for costs in excess of the tariff. Any Applicant who places unique or non-standard service demands on the water system may be required to provide contributions in aid of construction for the actual costs of any additional facilities required to maintain compliance with the DOH's minimum design criteria for Small Water Systems plus meeting any additional requirements needed to meet local service conditions. Utility shall bear all expenses related to main oversizing or additional production, storage or treatment facilities for individual residential Customers with normal domestic service demands.

EQUIPMENT: It is agreed and understood that any and all meters, water lines, and other equipment furnished by Utility (excepting the Customer's individual service after the point of delivery) is and shall remain the sole property of Utility, and nothing contained herein shall be construed to reflect a sale or transfer of any such meters, lines or equipment to any Customer. All service connection charges shall be for the privilege of connecting to said water lines and for installation, not purchase, of said meters and lines.

OTHER CONTRACTS: It is possible that Applicant and Utility will enter into an additional contract pertaining to water service at this location. Any such contract shall be in addition to this Application. Nothing therein will negate any provision of this Application.
