

BOIL WATER ADVISORY

Cherry Creek Water System

ID #23101 W- King County

In effect beginning: August 31, 2024

Effective immediately, we are advising people consuming drinking water supplied by the Cherry Creek Water System the water might not be safe for human consumption.

DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Boiling kills bacteria and other organisms in the water. Bring all water to a boil. Let it boil 1 minute at a rolling boil and let cool before using. Boiled or purchased, bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and food preparation until further notice. If you are experiencing illness symptoms, it is recommended that you see your health care provider.

This advisory is issued because:

- Repeat test resulted in coliform and e-coli positive results.

Follow-up will include the following:

- Water samples will be collected and tested. All the water samples must have satisfactory results before we will rescind this advisory.
- Batch chlorination will be done starting at the tank.
- We will continue to work with the Department of Health to ensure that safe and reliable drinking water is restored to you as soon as possible.

This advisory will remain in effect until Blue Rock Water Co, Northwest Water and the Washington State Department of Health (DOH) are confident the water is safe. When satisfactory results are reported, customers will be notified that the advisory has been lifted.

If you have any questions, you can contact us at **(206) 764-3345**, email service@bluerockmgt.com.
